An Soporosis Affectibus Emetica?

Breve artis Compendium, ad Naturam componi: Hinc prima illius Elementa, haec tota ultima. Naturae imitatio, unde; procurans laborantis, cui nempe quod nobis est opus, praestit in solidum debemus. Ecquid enim amabo, aliud Medicina, quam prolutenda alvi magistrum cum dixerit? Naturae in suas vindicias conantis, sal sum artis, et labor improbus. νενώσει, ἀποθέσει, μεταστάσει, quibus ars bene docta foeliciq; exemplo aemula, novit palpum obtrudere humori offenso. Quare hippopotamum bene caelerida, ibi ὁ naturae [illegible] ἐπικαιρικοῖς, παρηγορικοῖς, πεπαντικοῖς, quo illum tempestivius, ἐξίως καὶ ἀλύπως justa ratione eliminet; aut si [illegible] rogatum, porro exulibus subvenire deproperavit. Eadem praedunt, morbum morbo domiti reddimus. Haemorrhagias criticas, et Diarrhoeas conquisitis, depromptisq; beneficio, mittendi sanguinis, propinandiq; Pharmaci, [illegible] illa labentibus fiduciam. Sic cum sola non sit Morborum Medicatrix, Naturam modendi Magistram ubiq; se probat.

Neque tamen hoc aut datum est, quius opera, et studia imitari semper, beatumq; illud momentum artis moliens τὸ ἀκριβὲς consequi, quod illa dum requirit, tunc stare nolunt, nisi apud imperitos, [illegible], sudorificis per acutas febres [illegible] authoritatem, [illegible] sudoresq; liberi cum [illegible], Motum? [illegible] tum [illegible] τὸ [illegible] occupandi, [illegible] sollicitudo, quod huius primitias [illegible] Lassissam vindicavimus? In pleuritiq; aliis, morbo [illegible] loci irritatione. [illegible] suppuratas pleuritidis [illegible] media per vitalia in [illegible] colliquias [illegible], quod salutari [illegible] aufert [illegible] nusquam ὁδοὺς, quia nos [illegible] sibi habeat. Tandem igitur plane fovebis, illa inconsulta aliena [illegible] quae ὀλίγη ἐν ὀλίγῳ εὑρίσκει τὰς ἐξ- tuo si destinavit viam? [illegible] criminosius, si [illegible] ingratas, [illegible] nimium et [illegible] mutatur, aliena stations locales per toto corpore palantes compressis, [illegible] arbitratu primus nesesse, [illegible] parati compositiq; serventur? nihil [illegible] motus, aut quibus [illegible] vicina? Illorum ζωτὴν et [illegible] attendas protendere petulantia et licentia corrumperent. Hoc quidem [illegible] ordinem, [illegible], tuas est provincias, dum illos ex naturae praescripto pro finis, vel impedias pigro morigeros.

Quamobrem aeterna lege Criticos motus naturae solet διὰ τῶν συμφερόντων χωρίων moderari, alites si [illegible], morbo, artibus sinistris -itati imputa. Sic ἐμετικὴν imitam [illegible], prima naufragi [illegible] peccata, [illegible] habuit, neq; huius opus, sed convulsioni cognatus labor vomitus est, etiam πικροχόλοις ἄνω, [illegible]; qui ex facili vomunt [illegible] difficiles illi prodromi vomituriendum, ἄσαι, καρδιωγμοὶ, πταλισμοὶ, σείσις τοῦ κάτω χείλους: tantas moles [illegible] annonam; tantum [illegible] cloacam [illegible]. quod a naturae consilio studioq; perpetuo alienum, [illegible] in morbis, nusquam ex integro critici, saepius symptomatici vomitus prodeunt, [illegible] nocituri quo plenis magis hinc [illegible]; [illegible] molestior illa tot symptomatum [illegible], optimis quibusq; πλάνας καὶ ἀπορίας parat. Hinc naturae laborantis exemplo [illegible], ἐμετικὴν ἀγωγὴν [illegible] modis [illegible] in [illegible] facinore [illegible] vomitus [illegible], quas [illegible] cum [illegible], [illegible] subditantis, [illegible] ex alimentis τὰ ἐπιπολαστικὰ, χολαγικὰ, φλεγματικὰ, [illegible] officaciora φαρμακώδη, [illegible], aut quas minus placitura saporis, [illegible] dimidia, [illegible] [illegible] necessaria quandoq; [illegible], nec secura tamen [illegible], [illegible] Medicina; cetera sanis aegris, si naturam auscultas, [illegible]. [illegible] quidem illa, at

Desmano [illegible] sopore, nihil quicquam aegro gravius, capitalius nihil, sive communicato, sive privato τοῦ ἡγεμονικοῦ maleficio contigerit; quo [illegible] [illegible]; aestimanda [illegible] dolori noxa, vix aeque fatalis, quam [illegible], [illegible] sorbiliaq; [illegible] pro foribus [illegible] suggrundia [illegible] humoris [illegible] pluvima, ipsa [illegible] in foco vitalem extinctura flammam. Illius haud gravis [illegible] morbificas [illegible], [illegible], mixturae, [illegible]. Ex quo modo fit maior atq; [illegible] dormiendi necessitas κῶμα ὑπνῶδες cum catarphora [illegible]: modo κῶμα ἄγρυπνον, cuius tribulis κάροχι, τυφομανία illud sine febre, gentilis apoplexias, [illegible], vel cum febre [illegible]: hoc sine febre [illegible]; nullo [illegible] partium [illegible] damno vel otio, praeterq apoplecticis. [illegible] omnibus [illegible], partis principis [illegible] oblaesi sinus, aut ventriculi, [illegible], compressu, ἐσφλάσει: [illegible], crasso, pigro, frigido, lento, putri [illegible] biliosa humore ὑγραν θείσης τῆς σαρκὸς impediti meatus: vel denso halitu, [illegible] καρηβαρίῃ κάρῃ νωθρῇ βαρέως obsessati occupatiq; spiritus, quod per malignarum febrium [illegible] aestus, tristioraq; tempora [illegible] est, ex [illegible] maiore [illegible], quo pronus illa magis, faciliusq; ex [illegible] profligatis naturae robur [illegible] conatus depugnantis, ἐφιδρώσεις liquido antecessantur.

Quid tandem opera futurum, ubi quid adhuc naturae est reliqui? [illegible]: et qui, [illegible] vulgo [illegible], extrema extremis [illegible], ad famosum illud Emeticum, [illegible] protinus [illegible] judicaverit? Ita Empirici Parabolani dum [illegible] solida [illegible] infortunio [illegible] res capitis, [illegible] humorem [illegible] [illegible] studio [illegible]: sic illi patram ἀνδροφονίην, cuius prima morbus ipse rudimenta tentaverat, [illegible]; [illegible] capitis dolor, ἦχοι, surditas, oculorum gravedines, vertigo tenebricosa, [illegible] [illegible] ἰλιγγοῦν τῷ πάθει, modiciq; simul [illegible]: [illegible] quovis Emetico, nodum [illegible] illo quod [illegible], tibi [illegible] statim [illegible]. Si; naturam consulas, cui prima [illegible], nisi τοῖσι κενωθησομένοισιν, [illegible] fungi parotides, [illegible] quam illa jussu τὰ μετεωριζόμενα κάτω ὑπάγειν, graviter et hac formula [illegible] vomitu [illegible] ultra praesidium, quando [illegible] negotio [illegible] ἡγεμονικώτατον [illegible], efficacior si cum [illegible] τῶν ἐγγυτάτων τε καὶ κοινῶν τῶν πεπονθότι μορίων: subinde ἀσφαλέστερως [illegible], [illegible]; [illegible] purgans. Huic illiq; [illegible] auxilia, [illegible] cucurbitulas, sanguisugas, phlebotomi, [illegible] acriora, [illegible], [illegible] [illegible], caput [illegible], nec [illegible], fugienda.
